

What is the digest of United Kingdom energy statistics (DUKES)?

This series brings together all documents relating to the Digest of United Kingdom Energy Statistics (DUKES). The digest, sometimes known as DUKES, is an essential source of energy information. It contains: For PDF chapters and Excel tables of the 2024 edition, please see the energy sector statistics specific collection webpage.

What is the UK's energy supply in 2022?

In 2022, the United Kingdom's total energy supply (TES) was primarily composed of natural gas, contributing 39.4%, followed by oil at 34.8%, nuclear power at 8.1%, and coal at 3.2%. Biofuels and waste contributed 8.9%, while other renewable sources such as wind, solar, and hydro collectively accounted for 5.6% of the energy mix.

How is energy used in United Kingdom?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

United Kingdom: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...
