

United Kingdom solar power system for a home

Are solar panels efficient year-round in the UK?

Year-round efficiency: Solar panels can be efficient year-round in the UK, despite the country's reputation for cloudy weather. Advancements in solar panel technology have made them increasingly effective, even during the winter months.

Does the UK get a lot of solar power?

While the sunniest parts of the UK receive much less solar radiation than the sunniest parts of Europe, the country's insolation in the south is comparable with that of central European countries, including Germany, which generates about 10.7% of its electricity from solar power.

Are residential solar panels a good choice?

Residential solar panel installation services are witnessing a remarkable surge in demand across the UK as more homeowners discover the incredible advantages of domestic solar panels. Designed specifically for residential use, these solar panel systems offer a reliable and sustainable energy source.

What is the best roof direction for solar panels in the UK?

Specific solar panel placement: The best roof direction for solar panels in the UK is southwards with a 5° to 7° westward tilt. Certain roof types or orientations may not be suitable for accommodating solar panels, potentially reducing their optimal performance.

How much does a solar panel system cost?

The average package 3kW or 4kW solar panel system with battery, usually comes with a 4kW to 14kW battery. The average price of a solar panel system and battery ranges from £8,500 - £14,000 but can be considerably higher depending on the battery. If you want to include a storage solution you are going to have to pay more upfront.
