

How much electricity does Uruguay generate?

According to 2022 data from MIEM, Uruguay generated 14,759 GWh of electricity, 13,343 GWh for internal demand and exported 1,416 GWh to Brazil and Argentina. Typically, Uruguay generates a surplus of electricity due to an excess of wind-power capacity.

How much electricity did Uruguay export in 2022?

In 2022, exports of electricity represented \$222 million, which was less than 50 percent of the total amount of electricity exported in 2021. This decrease was primarily due to a severe drought which adversely affected the generation in Uruguay.

How many charging stations are there in Uruguay?

In May 2022, there were 89 charging stations and 122 chargers, distributed in most departments of the country. The electric vehicles sold in Uruguay have Type 2 connectors according to UNIT standards (UNIT - IEC 61851-1:2017 and UNIT - 1234:2016).

Why does Uruguay generate a surplus of electricity?

Typically, Uruguay generates a surplus of electricity due to an excess of wind-power capacity. The country seeks to identify additional domestic uses for excess electricity and potentially increase exports to Argentina and Brazil.

What type of connectors do electric vehicles have in Uruguay?

The electric vehicles sold in Uruguay have Type 2 connectors according to UNIT standards (UNIT - IEC 61851-1:2017 and UNIT - 1234:2016). The Government of Uruguay is also providing incentives and subsidies to increase the fleet of electric taxis and buses in the country.

How many hydroelectric plants are there in Uruguay?

Uruguay's hydroelectric generation capacity is 1,500 megawatts (MW) from four hydroelectric plants: Salto Grande (Salto), Palmar/Constituci3n (Rio Negro/Soriano), Rinc3n del Bonete (Tacuaremb3/Durazno) and Baygorria (Rio Negro/Durazno).

This report provides an in-depth analysis of the lithium battery market in Uruguay. Within it, you will discover the latest data on market trends and opportunities by country, consumption, production and price developments, as well ...

The distributed energy resources comprised of solar PV, batteries and remote monitoring technologies are being installed on a dairy farm in the Colonia Delta area, approximately 100km west of the capital Montevideo.

Uruguay energycell batteries

Uruguay EV Battery Market is expected to grow during 2023-2029 Uruguay EV Battery Market (2024-2030) | Share, Trends, Companies, Outlook, Industry, Value, Analysis, Forecast, Competitive Landscape, Size & Revenue, Growth, Segmentation

The main destination of Batteries exports from Uruguay are: United States (\$1.79k), United Kingdom (\$1.71k), Chile (\$1.1k), Czechia (\$217), and Slovenia (\$120). The fastest growing export markets for Batteries of Uruguay between 2021 and 2022 were United Kingdom (\$1.71k), Chile (\$1.1k), and Slovenia (\$78).

The government is strongly encouraging the production of green hydrogen and plans to make Uruguay a green hydrogen exporter. The need to upgrade Uruguay's power grid will create opportunities in the transmission, smart grid, and battery storage sectors.

Uruguay is a frontrunner in renewable energy integration in Latin America, with developing potential in the areas of battery storage and smart grid technologies. The country's electricity matrix is highly renewable, with over 97% of its power generated from renewable sources.

Proven lead-acid VRLA technology, combined with enhanced carbon additives, make it one of the safest batteries in the market. The EnergyCell XLC is unparalleled in performance backed up by a 10-year full replacement warranty (subject to terms and conditions).
