A Techno-economic Analysis of Carbon Management in Trinidad and Tobago through coupled Enhanced Oil Recovery and Geological Storage Submitted To: The Ministry of Energy and Energy Industry Executed By: The University of Trinidad and Tobago (UTT) Donnie Boodlal (Assistant Professor) David Alexander (Assistant Professor)

Trinidad and Tobago is an archipelagic nation in the southern Caribbean, located northeast of Venezuela and south of Grenada. Unlike many other Caribbean nations, the island has a relatively large industrial base. It is the largest producer of oil and gas in the Caribbean, sectors that contribute 46% to GDP. With a contribution to the GDP of around 1%, tourism [...]

The Energy Map of Trinidad and Tobago is a comprehensive map of the country's energy infrastructure, including oil and gas fields, pipelines, refineries, petrochemical plants, the LNG facilities and ownership of onshore and offshore license blocks.

Carbon Capture and Storage (CCS) /CCUS can be applied to large point sources such as fossil fuel energy facilities like the natural gas-powered plants located in Trinidad. After capturing the CO₂, it is then compressed and transported for geological storage. Pipelines are preferred for transporting large amounts of CO₂ for distances around 1000km.

A Techno-economic Analysis of Carbon Management in Trinidad and Tobago through coupled Enhanced Oil Recovery and Geological Storage (The 2018 Carbon Management study) already mentioned, was funded by the Government of Trinidad and Tobago at the cost of US \$470,835 or TT \$3,036,886. A proprietary reservoir screening tool for selecting suitable ...

The United States and Trinidad and Tobago enjoy strong bilateral ties supported by extensive bilateral and regional cooperation to advance shared interests. Vice President Kamala Harris spoke with Prime Minister Rowley today to continue their dialogue on efforts to strengthen the energy security and climate resilience of the Caribbean.

Renewable energy potential: Although the focus has primarily been on fossil fuels, Trinidad and Tobago is exploring renewable energy options such as solar and wind power. The government recognizes the need to diversify its energy sources and reduce reliance on hydrocarbons, paving the way for a more sustainable future.

Energy Storage -- Battery Assembly. Energy storage is a rapidly growing segment of the clean energy sector, and prices have dropped dramatically over the years. According to Wood Mackenzie's 2020 Global Storage Outlook, deployments will grow 13-fold from a 12-gigawatt-hour market in 2018 to a 158-gigawatt-hour market in 2024.
