

The study will conclude by the end of next year. Aside from these green hydrogen and green ammonia projects, ACWA Power also has five existing projects in Uzbekistan, including four wind projects and a combined gas cycle turbine facility. The country is the second largest in terms of value for the company after its home market of Saudi Arabia.

Uzbekistan has emerged as one of the most exciting growth countries for ACWA Power in recent years and is our biggest investment geography outside of KSA. We are proud that our giga scale development experience in green hydrogen is making us the preferred choice of partners across the world.

AGG helps you determine the best generator set for your needs and works with you to build a customized power solution for your oil and gas facility. Industrial installations need energy to power their infrastructure and production processes.

In the demanding field of data centers, AGG's diesel generators are trusted by our customers, and they can be sure that the AGG power generation system they choose is at the leading edge of reliability and dependability.
