

What type of energy is used in Serbia?

Energy in Serbia is dominated by fossil fuels, despite the public preference for renewable energy. Serbia's Total Energy Supply is almost 700 PJ, with the energy mix in 2021 comprising coal (45%), oil (24%), gas (15%), and renewables (16%).

What will Serbia's new energy production entail?

The new energy production should include new hydropower, solar and wind plants and last month, Serbia's President Aleksandar Vucic had said Belgrade was also considering a stake in the expanded Paks nuclear plant in neighbouring Hungary, which must be first approved by the EU.

What are the two largest power plants in Serbia?

The two largest power plants in Serbia, the hydroelectric power plant HPP Đerdap I at the Danube river and the coal power plant TENT, went into operation in 1970. Twelve years later, the pumped storage plant Bajina Bašta was built, and in 1990 the hydroelectric power station Pirot was put into operation.

When did Serbia start producing electricity?

On 6 October 1893, the first Serbian power plant, located in the Dorćol urban neighborhood of Belgrade, began production of electricity. In 1900, the first alternating current hydroelectric power plant Podgradom in Ušice on the river Zetinja went online.

Who owns Visegrad hydropower plant?

The Visegrad hydropower plant (HPP), operated by Hidroelektrane na Drini, a subsidiary of power utility... Bosnian power utility EP HZHB is in the process of selecting a contractor to conduct... Local company Hidroelektrane na Drini, a subsidiary of the state-owned power utility ERS, plans to...

Why is residential heating a major source of air pollution in Serbia?

Residential heating is a major source of air pollution in Serbian cities, especially in winter months, when it accounts for more than half of fine particulate matter (PM2.5) emissions, as the largest share of the heating needs are met by firewood and coal.

Je vous d'avis que la conception de vos procédés et de vos équipements thermiques est généralement remise en question, en raison d'une consommation de combustible excessive? Est-ce que l'efficacité énergétique était prioritaire à l'époque de leur conception? Est-ce que vos équipements thermiques ont été conçus dans une optique de rendement global optimisé; pour l ...
