

The Government of Vanuatu through the Ministry of Climate Change are taking concrete actions to mitigate climate change by promoting the use of Renewable Energy (RE) and Energy Efficiency (EE) technologies. These will help contribute to achieving sustainable energy, energy access, energy savings and greenhouse gas reduction.

Established in 2018, the National Green Energy Fund is a national financing vehicle designed to assist the Government to achieve its National Energy Roadmap targets through both public and private investment in technology and infrastructure across Vanuatu. The National Green Energy Fund aims to boost households and public institutions' energy ...

Vanuatu's National Energy Road Map (NERM) was considered and endorsed by the Council of Ministers in 2013. The NERM is the policy framework for developing the energy sector in Vanuatu. The NERM identified five priorities for the energy sector: access, petroleum supply, affordability, energy security, and climate change.

The aim of the Vanuatu National Green Energy Fund (NGEF) is to facilitate capital investment opportunities to improve energy access for households and businesses in rural and peri-urban areas resulting in improved livelihoods, job creation and greater opportunities for income generation through implementation of renewable energy and energy ...

With the National Green Energy Fund established and functioning, Vanuatu is well positioned to deliver renewable energy access and achieve energy savings across key economic sector including water, agriculture, fisheries and tourism.
