

Why did TotalEnergies buy VSB group?

The company has continued to expand its renewable energy portfolio even as some European peers have slowed investment in solar and wind. TotalEnergies SE agreed to buy German renewable project developer VSB Group from private equity firm Partners Group Holding AG for EUR1.57 billion (\$1.6 billion).

What does VSB group do?

VSB Group offers services including project management and environmental planning in the renewable energy sector. Its projects span solar, hydro and wind power in France, Germany, Poland and Italy. The company has more than 500 employees and 21 branch offices globally. Partners Group acquired an 80% stake in VSB Group in 2020.

Why did Total buy VSB?

The VSB acquisition will further expand Total's renewables presence in Germany, where it sees power prices being supported over the long term by the phase-out of coal-fired power plants, and the exit from nuclear power that was completed last year. Completion of the purchase is subject to regulatory approval.

Why should you choose VSB?

We have been implementing wind and solar projects for 25 years now. This benefits not just the environment but also the entire region, with customised concepts that add regional value and give citizens the opportunity to participate. Fair lease contracts and transparency in every development step are a matter of course for VSB.
