

Wav energy solutions Guyana

It is an untapped opportunity for Guyana. We must restart our relationship with that great nation and using the wave energy segment to do so may be an option worth pursuing. The Japanese have already gone past the development stage with the aid of Scotland and have implemented wave energy capturing technology in combination with wind energy ...

Local development of our wave energy capabilities would allow us to capitalise on local talent, local content, and add economic value to our continued growth and national expansion initiatives. The release of energy from industrial growth and increased fossil fuel consumption has resulted in an increased level of energy within the ocean network.
