

WeCo 4k5 ultra Barbados

How does a WECO 4k5-ultra battery module work?

Each WeCo 4K5-Ultra Battery Module has two different circuits and depending on the inverter voltage range, the installer must choose the correct battery configuration for that range. Low voltage uses fast connectors. High voltage mode requires dedicated DC /DC modules. High voltage mode is output by the DC /DC module.

What is a WECO battery?

WeCo is an Italy-based company that design and produce lithium batteries equipped with the highest quality components. WeCo battery modules have a capacity of 5.3 kWh and are stackable up to a cluster of 5 (LV) or 8 (HV) modules with a capacity of 22 kWh and 41 kWh respectively.

What is the capacity of a WECO battery module?

WeCo battery modules have a capacity of 5.3 kWh and are stackable up to a cluster of 5 (LV) or 8 (HV) modules with a capacity of 22 kWh and 41 kWh respectively. These clusters can be reconnected in parallel for higher capacities, with the additional option of expanding the container size up to a capacity of 2.7 MWh.

What is WECO BMS & LV/HV?

In addition, WeCo has developed one of the most advanced BMS (Battery management system) with active and passive equalizer with real-time control in each cell. Energy storage system for self-consumption or autonomous systems. 5K3 LV/HV.

What applications does WECO offer?

WeCo offers a wide range of applications, from single-family homes to medium-sized businesses to large industrial applications. These lithium battery systems are easy to install (plug and play) and are compatible with many international inverter manufacturers.

Can I copy a WECO datasheet?

We recommend contacting WeCo for the most up-to-date datasheet, read warranty and manual before making any purchasing decisions. No part of this document can be copied or reproduced without WeCo written permission. All data is subject to change without prior notice. Images herein are for demonstration only and may not reflect final product outlook.
