How to install rigid solar panels on a roof?

EcoFlow's rigid solar panels come with a Tilt Mount Bracketfor easy rooftop installation. The components include four fixing brackets,two adjustable brackets,and screws. This should be all you need to mount rigid solar panels on the roof or any other flat surface on your home that receives direct sunlight.

How to install a solar panel?

The first step is to attach the fixing bracket to the solar panel. Lay the solar panel face-down on the tarp or canvas to protect the photovoltaic surface. You want to be sure the mounting holes on the back of the panel align with the holes in the fixing bracket. Don't modify the module frame because doing so may void your manufacturer's warranty.

What is a DIY solar panel installation?

DIY installations allow you to customise your solar panel system to match your home's energy needs and roof layout(or perhaps even a balcony). Some professional installations may offer limited options,while a DIY approach allows for optimising panel placement,choosing specific components,and tailoring the system for maximum efficiency.
