Western Sahara, a sparsely-populated desert territory bordering the Atlantic Ocean, is Africa's last colony. In 1975, its coloniser Spain sold it to Morocco and Mauritania in exchange for ...

The case of Western Sahara is clear: two-thirds of the territory has been occupied by the Moroccan army since 1975, and now Morocco's main tool to continue the occupation has become the green transition. The invasion of the former Spanish colonial territories started in November 1975.

The UN regards Western Sahara as a non-self-governing-territory without an administering power in place. The International Court of Justice has found Morocco's claim to the territory null-and-void, findings echoed in a body of EU ...

In November last year, the organisation Western Sahara Resource Watch said that "possibly up to 81% of all land that the Moroccan government has allocated for new, gigantic plans for renewable energy, green hydrogen and ammonia, is located outside of Morocco"s international borders, in occupied Western Sahara."

The first round of land allocations in Morocco's green hydrogen investment process may soon be completed and is likely to include substantial areas in the contested territory of Western Sahara. African Energy has identified projects requiring the installation of at least 72GW of wind and solar generation, and more are likely to follow.
