

What does the photovoltaic panel line warranty mean

What is a solar installation warranty?

The most comprehensive solar installation warranties will include: - Product warranty: This covers defects in solar panel materials and workmanship, usually for 10-12 years. Replacement panels are covered. - Performance warranty: Guarantees a certain level of solar panel output (typically 80% of original) over 25-35 years.

How long is a solar panel warranty?

Solar panel warranties vary depending on the manufacturer, but in the solar industry, a 10-year product warranty and a 25-year performance warranty are typically considered the minimum standard. However, some manufacturers provide a 25-year product warranty and extend the performance warranty to 30 years. How Much Does a Solar Panel Warranty Cost?

What are the different types of solar panels warranty?

Types of Solar Panel Warranties There are several common warranty types offered on solar panels and other system components. The most comprehensive solar installation warranties will include: - Product warranty: This covers defects in solar panel materials and workmanship, usually for 10-12 years. Replacement panels are covered.

What is a performance warranty on a solar panel?

A performance warranty guarantees a maximum level of degradation- typically between .25% and .75% - per year so that in 25 years the panel will still have 80-90% of the power output it did in its first year. Performance warranties are important for sizing solar systems to maintain 100% offset for 25 years.

Do solar panels have warranty coverage?

When investing in a solar panel system for your home or business, one of the most important considerations is the warranty coverage. Solar panel warranties protect against defects and performance issues over the long lifespan of your system.
