

# What is the standard for wind power generation in Egypt

How much wind power does Egypt have?

Egypt's wind-generated power capacity is expected to reach 7 GW by 2022, making it an important contributor to the renewables energy mix. According to EY, Egypt currently has about 500 MW of wind-power plants in operation, plus three privately owned independent power producers (IPPs) with a generation capacity of 2.5 GW.

Is wind energy effective in Egypt?

According to the Wind Atlas, wind energy works effectively in several regions of Egypt, including the Gulf of Suez, a large region on the Nile bank, and some areas in Sinai, which have average wind speeds of up to 10.5 m/sec. Projects in Egypt are already harnessing this powerful natural resource. (See Fig. 2.)

Are wind energy projects economically feasible in Egypt?

Actually, and according to the 2019 Annual Report of New and Renewable Energy Authority in Egypt, the installed wind energy projects in Egypt have ensured more economical feasibility as the COE in 2019 was averaged by only 0.03 \$/kWh. Fig. 6. Average global COE (\$/kWh) between 2010 and 2019.

Does Egypt have a Wind Atlas?

Yes, Egypt has a Wind Atlas that was developed over the past 30 years in collaboration with outside organizations. The Wind Atlas identified many promising regions in Egypt for wind energy.

Are wind resources viable in Egypt?

In Egypt, the wind market increases quickly to make it one of the top countries in the Middle East. This study discusses the viability of wind resources and the economic assessment for four locations in Egypt: Ras El-Hekma, Farafra, Nuweiba, and Aswan through two stages.

What is the future of electricity production in Egypt?

The expectation of future electricity production from renewable energy in Egypt will be increased at 2035 to 42% of total electricity production. The total wind energy capacity in Egypt has increased from 750 MW in 2015 to 1,375 MW in 2019.

Egypt has solidified its position as the leading producer of solar and wind energy in the Arab world, according to a recent report by the Global Energy Monitor. The report places Egypt at the top ...

Taking advantage of strong, stable wind conditions, developers commissioned the 262.5 megawatt (MW), 125-turbine Ras Ghareb wind generation plant on the shores of the Gulf about ...

1 ??&#0183; The wind velocity range of 4-6 m/s dominated RE, AQ, and PS. At MM and Ar, this was

# What is the standard for wind power generation in Egypt

reduced to 2-4 m/s. The analysis of wind power density outlined significant insights into the ...

Current expansion plans of generation of different nations foresee an increased share of RESs in the electricity generation mix. For example, Egypt is identified as one of the next eleven world ...

The Wind Atlas showed many promising regions of Egypt that wind energy would work well. Three areas in particular, the Gulf of Suez, a large region on the Nile bank, and some areas in Sinai showed average wind speeds of up to 10.5 ...

This new 500 MW wind farm project builds on the past success achieved by the consortium in developing Gulf of Suez 1 - Ras Ghareb Wind Farm (262.5 MW), Egypt's first renewable energy Independent Power ...

To boost low-carbon electricity generation, Egypt can learn from countries that have successfully implemented a mix of clean energy solutions. For instance, Denmark predominantly relies on ...

o Egypt's wind resource is one of the best in the world; o There is ample land available with low alternative economic value; o Demand for electricity and other sources of energy is increasing ...

In addition, Moreover, Essa and Mubarak (2006) identified potential sites for wind power generation through analysis of wind speed and air density variation of five years meteorological data from ...

Wind-powered electricity generator: The first wind turbine to be installed will be connected to two 240-watt photovoltaic pan-els to create the first wind/solar hybrid system in Egypt. Once ...

mal power plants in the Egyptian system decreased significantly at these higher shares of wind power. It was shown that adding unit commitment to the power system simulations of Egypt ...

## What is the standard for wind power generation in Egypt
