

# Where to buy private photovoltaic panels

Do you offer solar panels for sale in the UK?

Since 2010, our friendly UK team have helped tens of thousands of people install the right Solar PV system, and we are keen to support you today and offer PV solar panels for sale. PV Solar Panels generate emission-free, clean electricity every day of the year in the UK and can vastly reduce your energy bills.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

How much do 4kW solar panels cost in the UK?

GreenMatch's research has found the average prices of domestic 4kW solar panel systems in the UK range between £5,000 - £6,000 (including installation costs), depending on the type of panels you install, their wattage and the manufacturer. Additionally, you can consider solar battery storage.

Can solar panels work in the UK?

The UK weather is ideal for the efficiency of solar panels for most of the year (including the winter). If you have a solar battery system, you could even store your excess electricity for a dark, wintery day to ensure a backup supply that's unaffected by seasonality.

How much do solar panels cost?

The average domestic solar panel system costs £5,000 - £6,000, for a 4kW system in homes with 2-3 bedrooms. The total cost of solar panels depends on how many panels you need for your home, which in turn is dependent on your energy consumption.

Are residential solar panels worth it?

If you compare this to the average annual electricity consumption of a household, which is around 2,700kWh according to Ofgem, residential solar panels can cover 117% of your electricity demand in perfect conditions. Other factors that affect whether solar panels are worth it include the following: Performance all year round.
