Here's an example of a 15kW solar system. The number of solar panels needed to create 15 kilowatts depends on the efficiency of the panels, though it typically hovers around 50 to 60 panels:. Bargain-bin panels typically see efficiency around 14.5% and put out about 240 watts each, so a 15-kilowatt installation would need a whopping 63 panels.

The location in Rijeka, Croatia is somewhat suitable for generating energy via solar photovoltaics (PV), which are systems that convert sunlight into electricity. The amount of electricity produced varies throughout the year depending on the season. In summer, each kilowatt of installed solar can produce about 6.97 kilowatt-hours of electricity per day, which is quite good.
