What are the ESS safety requirements for energy storage systems?

The International Fire Code (IFC) published its most robust ESS safety requirements in the most recent 2021 edition. By far the most dominant battery type installed in an energy storage system is lithium-ion, which brings with it particular fire risks.

#### Are energy storage systems flammable?

These systems combine high energy materials with highly flammable electrolytes. Consequently, one of the main threats for this type of energy storage facility is fire, which can have a significant impact on the viability of the installation.

### How does a fire protection system work?

In addition to controlling the automated extinguishing system, the fire protection system triggers all other necessary battery management system control functions. As its name implies - " aspirated" smoke and off-gas detection systems use an " aspirator" mounted in a detector unit.

### What is battery energy storage fire prevention & mitigation?

In 2019, EPRI began the Battery Energy Storage Fire Prevention and Mitigation - Phase I research project, convened a group of experts, and conducted a series of energy storage site surveys and industry workshops to identify critical research and development (R&D) needs regarding battery safety.

Can a lithium-ion battery energy storage system detect a fire?

Since December 2019, Siemens has been offering a VdS-certified fire detection concept for stationary lithium-ion battery energy storage systems.\*Through Siemens research with multiple lithium-ion battery manufacturers, the FDA unit has proven to detect a pending battery fire eventup to 5 times faster than competitive detection technologies.

#### What is energy storage & how does it work?

As the use of these variable sources of energy grows - so does the use of energy storage systems. Energy storage is a key component in balancing out supply and demand fluctuations. Today, lithium-ion battery energy storage systems (BESS) have proven to be the most effective type and, as a result, installations are growing fast.
