In the first half of 2024, the economy grew by 2.2%, driven by rebounds in domestic trade, manufacturing, and a substantial recovery in the energy sector, which saw double-digit growth following the 2023 energy crisis.

Moldova's CAD is structural in nature due to its reliance on agricultural exports and low value-added manufacturing sector, coupled with high energy imports. The improvement in the CAD was driven by a more pronounced decrease in imports (-6.6 percent), reflecting lower domestic demand and import prices, particularly energy.
