

xelectrix-power Reduce energy costs by using on-board inverter power to reduce consumer kW power peaks. Supplement power from the on-board inverter to meet high load peaks utilizing battery power.

The Power Box supports peak load capping, load shifting, and optimizing renewable energies using its Parallel Platform Technology. Individual Power Boxes can also be connected together for expanded storage capacity and performance.

After years of intensive research in battery and power control, the xelectrix Power Box PRO range was developed. Our modular and multi-functional system offers a unique inverter concept with the "Parallel Platform Technology".
