As a heat specialist, we contribute to energy saving and CO<sub>2</sub> reduction by proposing optimal waste heat utilization methods and air conditioning cooling systems for each customer's building and application.

Carbon Neutral Cooling Solutions - Yazaki Energy Systems offers innovative non-electric chillers that utilize waste heat for process cooling. Our thermal chillers support fuel switching and cogeneration, helping businesses achieve carbon neutrality while maintaining efficiency.

Focused on electric power, communication and general-use wire and cable, gas meters and related equipment, taximeters, air conditioning, solar and other environmental system equipment, Yazaki Energy System Corporation ...

Discover the wide range of energy solutions applications by Yazaki Energy, from industrial cooling systems to cogeneration and energy storage solutions. Learn how our efficient products improve performance across various industries.

The initial stages of another renewable energy project has been launched in the disputed Western Sahara region, which is under the control of Morocco. The Janassim project recently launched its measuring campaign of solar and wind energy potential.

The CHMG Series gas-fired cogeneration systems from Yazaki Energy provide high-efficiency combined heat and power (CHP) solutions, offering businesses a reliable and cost-effective way to generate electricity and useful heat simultaneously. These systems are ideal for industries seeking to reduce energy costs and carbon emissions.
