

Zeta energy ltd Greenland

Who is Zeta energy?

Chairman and CEO of US Grid Company and a respected leader in the US power industry. He has been responsible for structuring and investing more than \$100 billion in power and energy assets. Zeta Energy creates safe and long-lasting lithium-sulfur batteries that are higher performing, lower cost and sustainably manufactured.

Does Zeta energy use cobalt?

Zeta Energy's lithium-sulfur battery technology has been rigorously tested and has shown consistently better performance than existing lithium ion batteries. Even more importantly, Zeta Energy's lithium-sulfur batteries use no cobalt, nickel, manganese or graphite.

What is Zeta energy's battery technology?

Zeta Energy's battery technology is expected to enable breakthrough improvements in electric vehicles and grid energy storage, as well as many other applications. Zeta's technology uses no nickel, cobalt, manganese, or graphite, obviating the need for battery materials that have been subject to extreme volatility in pricing and availability.

What's new at Zeta energy?

As CEO Charles Maslin noted, "We have achieved a major milestone by demonstrating a scalable process for our anode technology. This is a great day for Zeta Energy." Zeta Energy's battery technology is expected to enable breakthrough improvements in electric vehicles and grid energy storage, as well as many other applications.

Does Zeta energy hold the new gold standard in energy storage?

"...Zeta Energy may hold the new gold standard in energy storage... these are exactly the kinds of breakthroughs that are needed if battery storage is to be adopted widely..." Lithium-Sulfur Battery Breakthrough from Zeta Energy? Zeta Energy: Breakthrough Battery? ACS Appl. Mater. Interfaces 2014,6,17,15033-15039

What materials does Zeta energy use?

Zeta's technology uses no nickel, cobalt, manganese, or graphite, obviating the need for battery materials that have been subject to extreme volatility in pricing and availability. All of Zeta Energy's materials can be sourced close to its manufacturing locations, relieving it from dependence on international supply chain constraints.

Zeta Energy is a US-based privately held company focused on developing, commercializing and manufacturing high-performance, safe, rechargeable batteries that are lower cost and sustainably produced.

Zeta energy ltd Greenland

Zeta Energy is a US-based privately-held company focused on developing and commercializing high performance, safe, rechargeable batteries that are lower cost and sustainably manufactured.
