Will a solar power plant help Egypt deal with power shortages?

The solar plant "will accelerate Egypt's green power strategy and help it deal with power shortages that took place over the past year", said the chairman of AMEA Power, Hussain Al Nowais, adding that the first electricity from the plant was delivered to the national grid last week.

Will AMEA power plant help address energy shortages in Egypt?

AMEA Power Chairman Hussain Al Nowais noted that the plant will expedite the implementation of the green energy strategy in Egypt and help address the energy shortages experienced last year. The first electricity from the plant was delivered to the national power grid last week.

Who is the main contractor for China's new solar power plant?

The main contractor for the project is the Chinese company Power China. Work on the power plant site began in March 2023. At the peak of construction, 3,500 people were working on-site. The power plant covers an area of 4,000 square miles and consists of over one million solar panels, 1,920 inverters, and 64 transformer stations.

Where is AMEA power located in Egypt?

On Saturday, the Egyptian government also signed a power purchase and land agreement with AMEA Power for an additional 500-megawatt wind power project worth \$600 million in Ras Shukeir, north of Hurghada in the Red Sea.

Why did Egypt have a power outage last summer?

Last summer, Egypt faced daily power outages lasting up to three hours caused by the high demand for cooling during heatwaves. AMEA Power Chairman Hussain Al Nowais noted that the plant will expedite the implementation of the green energy strategy in Egypt and help address the energy shortages experienced last year.

How many megawatts is a transformer in Egypt?

The two main transformers, the largest of their kind in Africa and the Middle East, have a capacity of 300 megawatts each and weigh 562,200 pounds. Last summer, Egypt faced daily power outages lasting up to three hours caused by the high demand for cooling during heatwaves.
