

Zimmermann solar Italy

Why should you choose Zimmermann solar?

Proud of offering 4 adapted solutions (tracker, fixed tilt, agrivoltaic and floating), Zimmermann Solar distinguishes itself by guaranteeing support in all steps of the project, from engineering and dimensioning to assembly and commissioning. "Choosing Zimmermann Solar becomes obvious".

What types of solar systems does Zimmermann solar offer?

Zimmermann Solar is proud to offer all types of configurations: Tracker, Fixed, Floating, Agrivoltaic. To date, Zimmermann has installed more than 5 GW of photovoltaic mounting systems in 53 countries. After the geological survey and soil preparation, we start pile driving according to the customized planning agreed with the client.

Who is Zimmermann solar?

As a result of the ambition to combine the metallurgical experience of the prestigious Zimmermann group and the ideal of a sustainable future, Zimmermann Solar emerged as a leading company specialized in the development of solar projects.

What is Zimmermann PV-floating?

ZIMMERMANN PV-Floating - An integrated, large-scale floating PV system. An integrated, large-scale floating PV system. If playback doesn't begin shortly, try restarting your device. Videos you watch may be added to the TV's watch history and influence TV recommendations. To avoid this, cancel and sign in to YouTube on your computer.

Who is Zimmermann PV-steel?

The ZIMMERMANN PV-Steel Group includes the PV-Fixed Tilt, PV-Tracker, PV-Floating and PV-Agri divisions. The cooperation between the various business segments fosters innovative ideas and developments of the company. Our products are designed, manufactured and sold with German precision through a global network of own and partner companies.

How are Zimmermann products made?

Our products are designed and manufactured with German precision and sold through our own global network and partner companies around the world. ZIMMERMANN's highly qualified employees utilise the best raw materials available to produce our solutions using precise, fully automated, state-of-the-art manufacturing and production facilities.

The ZIMMERMANN PV-Steel Group has been developing, planning and supplying solar mounting substructures for projects worldwide since 2009. Our portfolio comprises of ground-mounted solar mounting racks as rigid construction, as single axis trackers and on water as floating installations.

The ZIMMERMANN PV-Steel Group has been developing, planning and supplying solar substructures for worldwide projects since 2009. In our portfolio we have fixed mounting systems, single-axis tracking tracker systems and floating systems. As a fourth technology, we develop and construct systems for Agri-PV applications.

Designed for southern areas with high solar radiation and low snow loads. Adjustable tilt optimised for local wind loads. Yield-optimised design preserves the stability of the structure and maintenance walkways. High compatibility with all additional ZIM Float components.
