

The ambition is to develop large scale hydrogen production on Åland integrated with gigawatt scale offshore wind in Åland waters for use both on Åland and in the wider European region, thereby supporting Åland's and EU ...

Finland - CIP, through Copenhagen Energy Islands, Lhyfe, and Flexens have joined forces to launch the Åland Energy Island project. This initiative aims to fuse large-scale offshore wind generation with hydrogen production, positioning Åland as a key player in the green energy transition for the entire region.

CIP, through Copenhagen Energy Islands, Lhyfe and Flexens jointly launch the Åland Energy Island project. This project will integrate large-scale offshore wind generation ...

Finland's Åland selected for integrated wind-hydrogen island. Copenhagen Infrastructure Partners (CIP), Flexens and Lhyfe have formed a partnership to develop and construct the Åland Energy Island project, an integrated energy island bringing together large-scale offshore wind and green hydrogen production.

Flexens, Lhyfe and Copenhagen Infrastructure Partners (CIP) are to start developing a large-scale hydrogen production facility in Åland. The project will combine zero-emission hydrogen production with offshore wind ...

Finland - CIP, through Copenhagen Energy Islands, Lhyfe, and Flexens have joined forces to launch the Åland Energy Island project. This initiative aims to fuse large-scale offshore wind ...

Copenhagen Infrastructure Partners (CIP), Flexens and Lhyfe have partnered to develop an integrated energy island powered by offshore wind on the Åland island archipelago off the Finnish coast. Called the Åland Energy ...

Å...land energy global company

Copenhagen Infrastructure Partners, Flexens, and Lhyfe have formed a partnership for the development and construction of an ambitious integrated energy island solution enabling large-scale offshore wind, green hydrogen production, and other local anchored value creating activities on Åland, Finland.

Flexens, Lhyfe and Copenhagen Infrastructure Partners (CIP) are to start developing a large-scale hydrogen production facility in Åland. The project will combine zero-emission hydrogen production with offshore wind power, which will be built in the Åland Islands with a capacity of several gigawatts. Final investment decisions will be taken later.

Copenhagen Infrastructure Partners (CIP), Flexens and Lhyfe have partnered to develop an integrated energy island powered by offshore wind on the Åland island archipelago off the Finnish coast. Called the Åland Energy Island project, it will support gigawatt-scale offshore wind and green hydrogen production in Finland.

Finland's Åland selected for integrated wind-hydrogen island. Copenhagen Infrastructure Partners (CIP), Flexens and Lhyfe have formed a partnership to develop and construct the Åland Energy Island project, an integrated energy ...
